

SPIRAL OF HOOVES

In Canada, researcher Armand Sabatier witnesses what could be the murder of groom Odette Fedon, but traumatic images from his past smother his memory, and a snowstorm buries the evidence. Harassed by nightmares but fighting through them, Armand remembers the crime a few months later. By then he is in England, where he is dragged into a plot involving international sport horse breeding.

Suspecting everyone around him, Armand is forced to brave the past that he has kept buried. But what made Armand leave France? Where did he learn to survive and fight for justice? Why is the English rider Carly Tanner treading the same path as the first victim, Odette?

Can he save Carly before he has more blood on his hands?

"A thriller set in the high-stress, competitive environment of the horse riding life. Clarke mixes the excitement of the equestrian community with murder, romance, and friendships that are not what they seem. Clarke's prose evokes vivid imagery, and the plot keeps you guessing. A thoroughly enjoyable read."
